WORK EXPERIENCE

Full-Stack Software Engineer — Resilient Coders *Aug 2026 – Present*
Boston, MA (Remote)

- Build full-stack web applications using React, Node.js, Express, MongoDB, and PostgreSQL, from initial concept through production.
- Implement responsive design, SEO optimization, and security best practices to deliver fast, accessible sites across devices.
- Collaborate with engineers in an Agile workflow, using Git and GitHub for branching, pull requests, and code reviews across multiple client projects.
- Deploy and maintain applications on Netlify, Vercel, Render, and MongoDB Atlas, managing environment configuration and production builds.

Web Developer — Self-Employed *Sep 2026 – Present*
Boston, MA (Remote)

- Redesigned and optimized a live restaurant business website for a paying client, improving overall layout, navigation, and mobile responsiveness.
- Implemented on-page SEO improvements (page titles, meta descriptions, headings, image alt text) to improve search engine visibility for the business.
- Restructured site content and added new sections (testimonials, catering information, promotions, social links) based on client requirements gathered through direct client communication.
- Tested the site across modern browsers and screen sizes prior to deployment, then deployed the finished site to production, managing the project independently from requirements through delivery.
